

Best Practices

Best Practice 1

Title: Reading Hobby

Objective: Encouraging young minds from reading literary and scientific books.

Context: In the era of computers and technology, the people are gradually going away from the best practices of the all time. It is seen that the present generation is being techno-savvy and they are ignoring the importance of reading. This activity is initiated as one of the best practices to encourage the generation for developing reading as Hobby.

Practice: Reading Hobby competition 2018-19

In these days the present generation has been going away from the reading culture. In order to cultivate the reading culture among our students, the college took an initiative and started encouraging students for reading activities apart from their curriculum and academics.

Reading Hobby competition was held on 24.01.2019 in the college premises. Students from all the faculties attended the event. 19 students activity participated and expressed their understanding of the book in front of all the students and staff. 15 girls and 04 boys participated in the event.

Evidence: The outcome of the event was meticulously observed and other students are also inspired by the event and left the hall with an assurance that they will participate next year activity.

Problems Encountered & Resources Required

1. When we initiated with this activity, we got a very low response. We need to put in extra efforts in order to encourage them to participate in the event and perform their best.
2. We required library resources and human resources as well we identified a few titles and distributed among the students who were willing to participate actively. In addition, we appointed three faculty members.
 1. Dr. N.G. Yemekar
 2. Ms. J.D. Sampale
 3. Mr. D.B. Gaikwad

For the evaluation of the participants for event .

Best Practice 1

Title: Organic Agriculture

Objective: Encouraging farmers for organic agriculture

Context: The use of chemical fertilizers in the modern time has reached its pinnacle. The demand of food grain and growing population ratio indicating that the farmers have adopted modern technique of agriculture. It has severely affected our lives. This is a learning for us now to go back to nature and initiate with organic agriculture.

Practice: The institution initiated with this practice and created conducive atmosphere in the year 2018-19. A special talk was arranged on the topic “Challenges for agriculture and need of modern agriculture” delivered by Mr. Mohan Patil & Mr. Dhanraj Bande.
